SAC Burke of Denver called at 6:05 p.m. today and advised that SA [redacted] with a [redacted] today called at the King Farm approximately 7 miles west of Toponas, Colorado. They observed in one of the out buildings a new box bearing the label, number 2, Ajax Gold Metal, 1-1/8 by 8 inch, 45 per cent dynamite. The label indicated that the box was supposed to contain 50 lbs. of dynamite sticks which Burke thought would mean it contained 48<sup>b6</sup> sticks. He said the Agent lifted the box and shook it slightly and determined<sup>b7C</sup> that it was not a full box of dynamite sticks but he estimated it to be about half full. It bears a date which was not entirely discernible but which was either October 3 or October 5, 1955. The cover of the box had been removed but again nailed down. The Denver Office immediately contacted District Attorney [redacted] who in turn contacted District Attorney [redacted] of Routt County, Colorado. [redacted] is issuing a search warrant which will be served by Sheriff A. R. Hitter who will pick up for evidentiary purposes this partial case of dynamite.<sup>b6 b7C</sup>

At this time Burke also advised that further investigation concerning the possible purchase of dynamite by Graham from [redacted] the storekeeper at Kremmling, Colorado, had definitely confirmed that the subject was in Denver on October 29 and, therefore, could not have purchased the dynamite from [redacted] on that date as [redacted] claimed. This matter is receiving vigorous investigative attention for the purpose of definitely determining the source of the dynamite involved in this case. Burke also advised that the investigation report which is 230 pages long is ready for transmittal to the Bureau. In view of its weight and the cost which would be involved in sending it airmail, arrangements were made to turn it over as a sealed package to a pilot on United Air Lines flight 730 leaving Denver tonight flying nonstop for Washington and arriving in Washington at 7:35 a.m. tomorrow morning. He said United Air Lines in Denver suggested that the Bureau contact the station manager of United Air Lines at the Washington Airport who would obtain the package from the pilot and turn it over to the Agent. Arrangements have been made for the Washington Field Office to pick up this package from United Air Lines tomorrow morning.

This is for information.

At 3:25 today I talked with SAC Burke at Denver concerning the investigation with reference to the purchase of the dynamite sticks. Their teletype of yesterday's date indicated that [redacted] Kremmling, Colorado, recalled the sale of 20 or 2 dynamite sticks and 2 blasting caps to a person answering Graham's description. Arrangements were made for [redacted] to come to Denver this morning to observe Graham in a line-up. Reference is also made in this connection to the attached news clipping concerning this which makes reference to the statement that persons from Kremmling, Colorado, said Graham bought 25 sticks of dynamite there on October 29. The Director asked concerning this statement in the press "Is this established?"

Burke advised at the time of my call that Graham appeared in a line-up with seven other men this morning and [redacted] identified Graham as the man to whom he had sold the dynamite sticks and the two blasting caps. He said there was no doubt whatsoever in his mind that Graham was the man and that it occurred on October 29. Burke mentioned that Graham had previously indicated he was elsewhere with some friends on the 29th and therefore the matter was gone into rather thoroughly with [redacted] as to his recollection. [redacted] tied the date in with some work he was doing on his ranch and was certain beyond any question that the sale to Graham occurred on this date.

Denver was instructed to conduct immediate investigation to corroborate [redacted] story with such other witnesses as may be available or with any records [redacted] might have and any other investigation which may help to support [redacted] testimony. They should also conduct such additional investigation as may be necessary with reference to any alibis or any claims Graham may have as to his activities on this date. SAC Burke was instructed to advise the Bureau immediately in the event of any other pertinent developments in this case, paying particular attention to the development of any physical evidence. 98-43035-147

RE: JACK GILBERT GRAHAM  
SABOTAGE

In reviewing report submitted your office 11-21-55 and subsequent material, certain items were noted which make it absolutely essential additional evidence be developed if at all available. Concerning timer which subject purchased from Joseph Grande, Denver, it appears inconsistent subject would have exchanged 9038 model for 9024 model if either was actually used in construction of bomb since the 9038 would have been better suited to his purpose. Possibility exists 9024 may still be in his possession and will be produced at trial to refute evidence introduced by state concerning purchase of timer. Possibility also exists Joseph Grande may be mistaken and that subject actually purchased 9038 model which could have been used by him providing he set timer after arriving at airport while placing straps on mother's luggage since this was approximately one hour prior to explosion and this model was one hour timer. All facts pertaining to timer should be minutely examined and all possible leads pushed vigorously to develop complete information.

With regard to purchase of dynamite from [redacted] Kremmling, Colorado, it is noted that while [redacted] has definitely identified subject as purchaser of dynamite, you have advised that date furnished by [redacted] was inconsistent in that subject known to have been in Denver on 10-29-55. In addition, yellow wire found in subject's pocket found identical with wire from Illinois Powder Manufacturing Company blasting cap and not similar to wire on blasting caps which [redacted] stated he sold to subject. This matter must be vigorously and thoroughly explored in attempt to obtain corroboration of [redacted] statement that he sold dynamite to subject or to obtain information as to other sources where subject obtained dynamite and/or blasting caps. Furnish additional details concerning box of dynamite found on King ranch including whether definitely determined to be full case and whether ranch employees have been interviewed as to explanation of presence of this dynamite on ranch. In connection with developing additional evidence, consideration should be given to minute crime scene search for bomb fragments if weather permits and ground is free from snow, utilizing man power from United Air Lines or local authorities in addition to Agents your office. Submit daily teletype advising of progress and developments. Furnish Bureau copies of summary letter prepared by your office to furnish facts to district attorney as soon as available.
